

## IBM

### **(WS009) Fundamentals of Cloud Computing**

03 May 2011

This course teaches the basic concepts and terminology of cloud computing; the various service delivery models of a cloud computing architecture; and the differences between public, private, hybrid, and community cloud deployments. The course also covers the security challenges of cloud deployments, the IBM cloud computing architecture, and various IBM cloud offerings.

A number of self-running and hands-on demonstrations show how to access and use cloud-based instances, such as the IBM Smart Business Development and Test Cloud and the IBM WebSphere CloudBurst appliance.

**Skill Level:** Introductory

**Format:** Other

**Language:** English

#### **Unit 1. Overview of cloud computing ..... 1-1**

Unit objectives .....	1-2
What is a cloud? .....	1-4
Definition of cloud .....	1-6
Definition of cloud computing .....	1-8
Key characteristics of cloud computing (1 of 2) .....	1-10
Key characteristics of cloud computing (2 of 2) .....	1-12
Why use clouds? .....	1-14
How clouds are changing industry .....	1-17
How clouds are changing IT .....	1-19
Driving factors towards cloud computing (1 of 2) .....	1-22
Driving factors towards cloud computing (2 of 2) .....	1-24
Concerns related to cloud computing .....	1-26
Other technologies that can be used in cloud computing .....	1-28
Comparing grid with cloud computing .....	1-31
Public clouds (commercial) .....	1-33
Unit summary .....	1-35
Checkpoint .....	1-37
Checkpoint answers .....	1-39

#### **Unit 2. Cloud computing concepts ..... 2-1**

Unit objectives .....	2-2
Topics .....	2-4
2.1. Concepts of cloud computing. ....	2-7
Concepts of cloud computing .....	2-8
Cloud computing leverages the Internet .....	2-10
Positioning cloud to a grid infrastructure .....	2-12
Elasticity and scalability .....	2-14
Elastic use of resources .....	2-16
Virtualization .....	2-18
What can be virtualized? .....	2-20
Characteristics of virtualization .....	2-22

Benefits of virtualization . . . . .	2-25
Virtualization in cloud computing . . . . .	2-28
Hypervisors . . . . .	2-30
Comparing non-virtualized versus virtualized systems . . . . .	2-
<b>Unit 2. Cloud computing concepts . . . . .</b>	<b>2-1</b>
Unit objectives . . . . .	2-2
Topics . . . . .	2-4
2.1. Concepts of cloud computing. . . . .	2-7
Concepts of cloud computing . . . . .	2-8
Cloud computing leverages the Internet . . . . .	2-10
Positioning cloud to a grid infrastructure . . . . .	2-12
Elasticity and scalability . . . . .	2-14
Elastic use of resources . . . . .	2-16
Virtualization . . . . .	2-18
What can be virtualized? . . . . .	2-20
Characteristics of virtualization . . . . .	2-22
Benefits of virtualization . . . . .	2-25
Virtualization in cloud computing . . . . .	2-28
Hypervisors . . . . .	2-30
Comparing non-virtualized versus virtualized systems . . . . .	2-
<b>Unit 3. Cloud service delivery models . . . . .</b>	<b>3-1</b>
Unit objectives . . . . .	3-2
Cloud service models . . . . .	3-4
Cloud service model architectures . . . . .	3-7
Infrastructure as a service (IaaS) architecture . . . . .	3-10
Infrastructure as a service (IaaS) details . . . . .	3-12
Platform as a service (PaaS) architecture . . . . .	3-14
Platform as a service (PaaS) details . . . . .	3-16
Platform as a service (PaaS) patterns . . . . .	3-18
Examples of PaaS software . . . . .	3-20
Software as a service (SaaS) architecture . . . . .	3-22
Software as a service (SaaS) details . . . . .	3-24
Examples of SaaS applications . . . . .	3-26
Trade-off in cost to install versus flexibility . . . . .	3-28
Other cloud service models . . . . .	3-30
Common cloud management platform reference architecture: Architecture overview diagram . . . . .	3-33
Common cloud management platform . . . . .	3-35
Unit summary . . . . .	3-37
Checkpoint (objective only) . . . . .	3-39
Checkpoint answers . . . . .	3-41
<b>Unit 4. Cloud deployment scenarios. . . . .</b>	<b>4-1</b>
Unit objectives . . . . .	4-2
Cloud deployment models . . . . .	4-4
Public clouds . . . . .	4-
Hybrid clouds . . . . .	4-11
Community clouds . . . . .	4-13
Virtual private clouds . . . . .	4-15
Vertical and special purpose clouds . . . . .	4-17

Migration paths for cloud adoption .....	4-19
Selection criteria for cloud deployment types (1 of 4) .....	4-21
Selection criteria for cloud deployment types (2 of 4) .....	4-23
Selection criteria for cloud deployment types (3 of 4) .....	4-25
Selection criteria for cloud deployment types (4 of 4) .....	4-27
Case study example: IBM ITE cloud (1 of 3) .....	4-29
Case study example: IBM ITE cloud (2 of 3) .....	4-31
Case study example: IBM ITE cloud (3 of 3) .....	4-33
Unit summary .....	4-35
Checkpoint (objective only) .....	4-37
Checkpoint answers .....	4-39
Demonstration .....	4-41
Demonstration objectives .....	4-43
Demonstration .....	4-45
Demonstration objectives .....	4-47
Demonstration instructions (optional) .....	4-49
<b>Unit 5. Security in cloud computing .....</b>	<b>5-1</b>
Unit objectives .....	5-2
Topics .....	5-4
5.1. Cloud security reference model .....	5-7
Cloud security reference model .....	5-8
Cloud reference model .....	5-10
How security gets integrated .....	5-12
5.2. Cloud security risks .....	5-15
Cloud security risks .....	5-16
Security is the top concern .....	5-18
Understanding security risks .....	5-20
5.3. Principal security dangers to cloud computing .....	5-23
Principal security dangers to cloud computing .....	5-24
Principal security dangers to cloud computing .....	5-26
Virtualization and multitenancy .....	5-28
Nonstandard and vulnerable APIs .....	5-30
Internal security breaches .....	5-32
Data corruption or loss .....	5-34
User account and service hijacking .....	5-36
5.4. Steps to reduce cloud security breaches .....	5-39
Steps to reduce cloud security breaches .....	5-40
Reducing cloud security breaches .....	5-42
5.5. Identity management: Detection and forensics .....	5-45
Identity management: Detection and forensics .....	5-46
Identity management .....	5-48
Benefits of identity management .....	5-50
Detection and forensics .....	5-54
5.6. Encryption techniques .....	5-57
Encryption techniques .....	5-58
Encrypting data .....	5-60
Symmetric key encryption .....	5-62
Asymmetric key encryption .....	5-64
Digital signature .....	5-66

What is SSL? . . . . .	5-68
Solving the security problems . . . . .	5-70
SSL provides . . . . .	5-72
Unit summary . . . . .	5-74
Checkpoint . . . . .	5-76
Checkpoint answers . . . . .	5-78
Checkpoint (optional) . . . . .	5-80
Checkpoint (optional) answer . . . . .	5-82
<b>Unit 6. IBM cloud computing architecture and offerings . . . . .</b>	<b>6-1</b>
Unit objectives . . . . .	6-2
Topics . . . . .	6-4
6.1. Cloud services and vendor positioning . . . . .	6-7
Cloud services and vendor positioning . . . . .	6-8
IT Services that can be standardized for cloud . . . . .	6-10
Cloud service layers and vendor positioning . . . . .	6-12
IBM cloud services . . . . .	6-15
Analytics services . . . . .	6-18
Lotus Live . . . . .	6-20
Other collaboration tools . . . . .	6-22
Shared middleware services . . . . .	6-25
Security . . . . .	6-27
IBM Smart Business Development and Test Cloud . . . . .	6-30
6.2. Cloud computing for a test environment . . . . .	6-33
Cloud computing for a test environment . . . . .	6-34
Using cloud computing for a test environment . . . . .	6-36
6.3. IBM cloud architecture and TSAM. . . . .	6-39
IBM cloud architecture and TSAM . . . . .	6-40
Cloud systems view (1 of 2) . . . . .	6-42
Cloud systems view (2 of 2) . . . . .	6-44
IBM Tivoli Service Automation Manager (TSAM) . . . . .	6-47
Service request flow with TSAM . . . . .	6-50
TSAM overview screen of key metrics and tasks for the cloud administrator . . . . .	6-52
A spectrum of deployment options . . . . .	6-56
6.4. Development and test on the IBM cloud . . . . .	6-59
Development and Test on the IBM cloud . . . . .	6-60
IBM Smart Business Development and Test on the IBM cloud . . . . .	6-62
IBM Smart Business Development and Test Cloud portal: Sign in . . . . .	6-64
Account administration: adding a user . . . . .	6-66
Creating an instance (1 of 7) . . . . .	6-68
Creating an instance (3 of 7) . . . . .	6-72
Creating an instance (4 of 7) . . . . .	6-74
Creating an instance (5 of 7) . . . . .	6-76
Creating an instance (6 of 7) . . . . .	6-78
Creating an instance (7 of 7) . . . . .	6-80
Generating security keys (1 of 2) . . . . .	6-82
Generating security keys (2 of 2) . . . . .	6-84
Instance compute resources . . . . .	6-86
Image use options (1 of 2) . . . . .	6-88
Image use options (2 of 2) . . . . .	6-90

Premium services options . . . . .	6-92
Other IBM cloud services . . . . .	6-94
Unit summary . . . . .	6-96
Checkpoint . . . . .	6-98
Checkpoint answers . . . . .	6-100
Checkpoint (optional) . . . . .	6-102
Checkpoint (optional) answers . . . . .	6-104
Demonstration . . . . .	6-106
Demonstration objectives . . . . .	6-108
Demonstration . . . . .	6-110
Demonstration objectives . . . . .	6-112
Demonstration . . . . .	6-114
Demonstration objectives . . . . .	6-116
<b>Unit 7. IBM WebSphere CloudBurst and IBM WebSphere Hypervisor edition . . . . 7-1</b>	
Unit objectives . . . . .	7-2
What is IBM WebSphere CloudBurst? . . . . .	7-4
Provisioning of WebSphere Application Server instances . . . . .	7-7
Benefits of an appliance . . . . .	7-9
What is WebSphere Application Server Hypervisor Edition? . . . . .	7-12
WebSphere Application Server Hypervisor Edition features . . . . .	7-14
WebSphere CloudBurst console . . . . .	7-16
Dispensing WebSphere Hypervisor edition images . . . . .	7-18
Catalog . . . . .	7-20
Patterns . . . . .	7-22
Virtual systems: Deployed patterns . . . . .	7-24
Virtual image life cycle . . . . .	7-26
Unit summary . . . . .	7-28
Checkpoint (objective only) . . . . .	7-30
Checkpoint answers . . . . .	7-32
Demonstration . . . . .	7-34
Demonstration objectives . . . . .	7-36
Demonstration instructions . . . . .	7-38
<b>Unit 8. Course summary. . . . . 8-1</b>	
Unit objectives . . . . .	8-2
Course learning objectives (1 of 2) . . . . .	8-4 Class
evaluation . . . . .	8-8
To learn more on this subject . . . . .	8-10
References . . . . .	8-12
Unit summary . . . . .	8-14
